

Thank you to everyone who supported our Fall Campaign

Everything is coming up tulips

Jenna Moir, Charlotte Gill and Maya Gill work together planting the bulbs.

Foundation President, Judy Savage, Murdo McKenzie and Bob Black (Kiwans Club of Capilano) help plant bulbs.

Lions Gate Hospital's campus will be blooming with tulips this Spring thanks to our community!

Lions Gate Hospital Foundation recently completed another successful campaign raising more than \$2M towards urgently needed hospital equipment. Through a donation from **GardenWorks** more than 3500 tulip bulbs have been planted as a way of thanking and recognizing every donor to this campaign. Several community members were on site to help with planting the bulbs, and Premier Landscaping volunteered their time for additional planting.

The equipment purchased through this campaign will benefit a variety of hospital departments allowing staff the ability to offer their patients the best care possible.

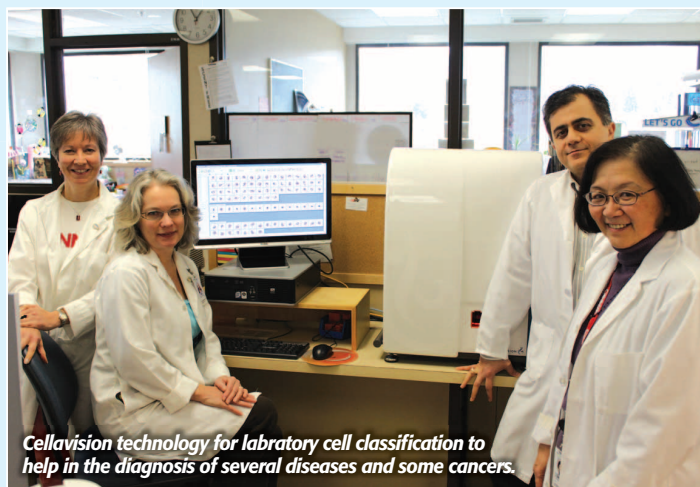

Here is a sample of what your generous support has bought...

Three new ventilators to be used for critical care patients to assist with mechanical ventilation.

Seven Infant Treatment Centres (also known as "Panda ITC's") are used in every labour/delivery suite and the Special Care Nursery.

Cellavision technology for laboratory cell classification to help in the diagnosis of several diseases and some cancers.

LIONS GATE HOSPITAL FOUNDATION

The Foundation is now raising funds to purchase critical equipment for Lions Gate Hospital's operating rooms. More than 14,000 procedures are performed in 9 operating rooms by 41 surgeons each year. From tonsillectomies and cataract surgeries to specialized neurological procedures and hip and knee replacements, surgeons perform a wide array of life-saving and life-enhancing procedures. **For more information please visit www.lghfoundation.com or call 604-984-5785.**
